

## ABSTRACT

The present invention provides polynucleotides and polypeptides which are diagnostic markers for stomach cancer. In addition, antibodies immunospecific for these markers are provided. Vectors, hosts cells and methods for producing these markers, as well as methods and tools for using these markers in detecting, diagnosing, monitoring, staging, prognosticating, imaging and treating stomach cancer are also provided.

Variable	Mean	Standard Deviation	Minimum	Maximum
Age	35.2	12.5	22	65
